

SERIES TWO

MANUAL WINDING - HOURS, MINUTES & SECONDS

**Please note that the rendering of the dial and case are incredibly difficult to capture correctly, for various reasons including the unique hand finishing applied. The image is for reference only.*

MOVEMENT:

- Reuben Schoots' latest in house movement developed for Series Two
- Focus on intriguing 3D geometry
- 18,000 vibrations per hour
- Frosted finished plates and bridges
- Hand finished
- Daniels style Steel Centre Cock
- Nickel silver mainplate and bridges
- Beryllium Copper Crown Wheel Cap
- Numbered and signed
- An existing gear train and escapement are used and modified/hand finished to suit

DIAL & HANDS:

- Multiple piece dial with subsidiary seconds
- Reuben's own hand flaked finishing technique
- Superior material selection, a more refined manufacturing and geometric changes to enhance the overall dial proportions will give improved contrast, better legibility and a more pleasing overall aesthetic. The dial will showcase Reuben's craftsmanship.

CASE:

- 41.5mm In house designed and manufactured 316L Stainless steel
- Sapphire crystal front and back

STRAP:

- Australian made from Australian leather

IN HOUSE DESIGN AND MANUFACTURE

It is important to me that my collectors know exactly what I design and make from raw materials in my workshop here in Canberra. The list includes:

DIAL

- Dial backing
- Chapter ring
- Subsidiary seconds dial
- Hour, minutes and seconds hands
- Name plate

CASE

- Bezel
- Case body
- Case back
- Crown tube
- Crown

MOVEMENT

- Mainplate
- Barrel bridge
- Wheel train bridge
- Centre wheel steel cock
- Pallet fork and escape wheel cock
- Balance cock
- Crown wheel cap
- All movement screws
- Clickworks (ratchet pawl and clickspring)
